

SUBSTITUTE SPECIFICATION

[Electronic Version 1.2.8]

[GOLF CLUBS AND A METHOD FOR USING
THESE GOLF CLUBS FOR GOLF SHOTS UP TO
100 YARDS FROM THE GREEN]

Detailed Description

[0001] INVENTORS: LARRY W. COLLUM of HAZLETON, PA and CHARLES LAZUN
of WESCOSVILLE, PA

[0002] This Non-Provisional Patent Application seeks to obtain priority based
upon Provisional Patent Application 60/407,415 dated August 28, 2002.

[0003] Background of the Invention

1. Field of the Invention. The present invention relates generally to golf clubs and a method for using these golf clubs to propel a golf ball onto the "green" from distances up to 100 yards. More specifically, the invention is a series of unique golf clubs with wooden golf club heads displaying greater than normal and varying loft angles, greater than normal lie angles, shorter club shaft lengths, and a new method for using these unique golf clubs for performing "chip shots"
